

ABU DHABI INTERNATIONAL AIRPORT

Abu Dhabi Airports Company (ADAC)

ENGIE Solutions was awarded a contract to provide Hard FM services to Abu Dhabi International Airport (AUH) and City Terminal. Abu Dhabi International Airport is the second largest airport in the UAE and one of the fastest growing aviation hubs in the world. Passenger numbers at AUH reached over 24 million in 2016, and that figure is expected to rise to over 45 million in the coming decade.

ENGIE Solutions ensured robust processes and procedures were in place to recruit the personnel with the right competencies to deliver the scope of work. In order to meet the specific standards required by ADAC, we developed a comprehensive training schedule tailored to meet specific requirements of this prestigious airport. ENGIE Solutions provides a 5-star experience in the aviation industry by increasing quality standards, dedicated to enhancing and providing a safe passenger experience.

SCOPE

Hard FM services including MEP; civil and building fabric maintenance services; fire and life safety systems; specialised airport systems including power, complex utilities systems, security systems, passenger boarding bridges, ground power units, pre-conditioned air, baggage handling systems and hold baggage screening. Other services include 24/7 helpdesk and contact centre, and managing agent services for client subcontractors.

DURATION:

2017 - present
